

Chippey's
DASH FOR CASH

Dash for Cash players take an adventure through the Wild West to win Random Rewards® on any bet

OVERVIEW

Paltronics' Dash for Cash is a Random Rewards progressive bonusing theme that provides a fast and affordable way for casinos to extend the life of existing machines, increase performance, and drive increased revenue.

Random Rewards is Paltronics' patented bonusing concept that is different from standard progressives in that it has a higher hit frequency and operates independently from the base game outcome, so there is **no winning combination** required for players to win the bonus award. With Random Rewards, operators determine jackpot values, percent contribution from coin in, hit frequency, and average award amount.

Pictured below are examples of an Overhead and Top Box configuration. Additional configurations and themes are available.

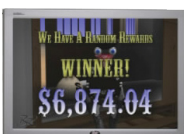

Attract Example

DASH FOR CASH HIGHLIGHTS

- Awards are independent of base game payable—**no winning combination required**
- Animations include player attract modes, 4 level progressive odometers, and winner celebrations
- Awards includes progressives and smaller bonuses paid to the winning player's EGM
- Fast and affordable way to extend the life of machines, increase performance, and drive increased revenue
